Re: Potlatch Site Inspection Report
AFIN: 50-00001
EPA ID: ARN000607141

Dear Mr. Ofosu:

The Site Inspection (SI) for the Potlatch site in Prescott, Nevada County, Arkansas has been completed. Enclosed please find one CD and one hard copy of the SI Report. The Hazardous Ranking System (HRS) Quickscore package for this site is also included.

This site was first brought to the attention of the Arkansas Department of Environmental Quality – Hazardous Waste Division (ADEQ) because of its location in a residential area, its previous use as a lumber mill, and its historical waste management practices. Due to the contaminants in the soil exposure pathway and the surface water migration pathway meeting observed contamination criteria, scoring the site using the HRS Quickscore was recommended. Due to a site score of 5.37, the ADEQ has recommended no further investigation at this time.

Upon your review and approval of this SI Report, please sign the appropriate pages and return to my attention. This will assist ADEQ's tracking and filing procedures.

If you have any questions or require additional information, please contact me at (501) 682-0874 or by email at bakerb@adeq.state.ar.us.

Sincerely,

Brett Baker
Site Assessment Supervisor
